.NET 4.0 TRAINING

.NET 4.0 TRAINING ONLINE AND CLASSROOM

ASP.NET is the simplest way to develop dynamic websites and web applications using MS.NET Framework. What many don't know is that ASP.NET is a Framework by itself and not a programming language. C# is the best choice of programming language used for writing code in ASP.NET websites.

If you have passion towards web development then our Online ASP.NET Training course will provide you with the complete knowledge required to building dynamic websites. Mr. Sandeep Soni, (MCPD in web development) in his ASP.NET videos series has very well demonstrated the mindset one should have to develop websites from ground up. Let it be a complex topic like ASP.NET architecture, he has done an excellent job in simplifying the subject in a language which even a beginner can easily understand and use in his work place.

.NET 4.0 COURSE MODULES

INTRODUCTION TO ASP.NET

- ✓ Understanding Web Communications
- ✓ Working With Web Configuration Files
- ✓ Creating A Website
- ✓ Adding New Web Pages

WORKING WITH PAGE LAYOUT AND DESIGN

- ✓ Implementing Master Pages
- ✓ Applying Themes And Skins
- ✓ Implementing Caching

PERFORMING SITE NAVIGATION

- ✓ Menu Control
- ✓ SiteMapPath Control

HANDLING EVENTS AND MANAGING STATE

- ✓ ASP.NET Page Life Cycle
- ✓ Server Side State Management
- ✓ Handling Events
- ✓ Client Side State Management

USING COMMON SERVER CONTROLS

- ✓ Label Control
- ✓ RadioButton Control
- ✓ Button Control
- ✓ TextBox Control
- ✓ DropDownList Control
- ✓ CheckBox Control
- ✓ ListBox Control

EXPLORING SPECIALIZED SERVER CONTROLS

- ✓ Table Control
- ✓ Calendar Control
- ✓ Image Control
- ✓ FileUpload Control
- ✓ ImageButton Control
- ✓ Panel Control

USING DATA VALIDATION CONTROLS

- ✓ RequiredFieldValidator Control
- ✓ RegularExpressionValidator Control
- ✓ CompareValidator Control
- ✓ CustomValidator Control
- ✓ RangeValidator Control

USING ADO.NET TO ACCESS DATA

- ✓ Introduction To ADO.NET
- ✓ Disconnected Model
- ✓ Understanding ADO.NET Architecture
- ✓ Connected Model

EXPLORING ADO.NET CLASSES

- ✓ SqlConnection Class
- ✓ SqlDataAdapter Class
- ✓ SqlCommand Class
- ✓ DataSet Class
- ✓ SqlDataReader Class

WORKING WITH GRIDVIEW CONTROL

- ✓ Inserting Captured Data Into Database
- ✓ Deleting Data
- ✓ Displaying Data In A Webpage
- ✓ Editing Data
